PROJECTS

Anil Jewellers — Revenue Generation Project

May’ 25

React.js, Tailwind CSS, Vite, Node.js, Express.js, Firebase, Git, Vercel, Render

Live: www.aniljewellers.shop

- Engineered a full-stack e-commerce platform supporting 100+ jewellery products, integrating backend APIs, authentication, database operations, and customer purchasing workflows.
- Developed and integrated 10+ RESTful API endpoints using Node.js and Express.js for product, user, and application data management.
- Implemented Firebase Authentication and structured NoSQL data management across 5+ application workflows, enabling secure user access and efficient data operations.
- Built 15+ reusable React.js components with Tailwind CSS and Vite and deployed frontend and backend services using Vercel and Render.

ZentiqAI — Group Project – Multimodal AI Chatbot

Jun’ 25

Next.js, React.js, Firebase, LLaVA-13B, Qwen

Live: zentiqai.vercel.app

- Collaborated with a development team to build a multimodal AI chatbot supporting 2 interaction modes: text-based conversations and image-based analysis.
- Integrated 2 AI models, LLaVA-13B and Qwen, enabling text generation, image understanding, and AI-driven multimodal response generation.
- Designed backend data workflows for managing user interactions and AI-generated responses, integrating 2+ authentication options to provide secure and reliable access to AI-powered services.
- Developed 15+ responsive UI components using Next.js and React.js and deployed the production application on Vercel using Git and GitHub.
